MEMORANDUM FOR SYMPOSIUM ATTENDEES

SUBJECT: Acquisition and Logistics Reform Stand-Down Day
Symposium V

Welcome to our fifth Acquisition and Logistics Stand-Down Day Symposium! Acquisition and Logistics Reform continues to be a critical element of the Department of Defense's Revolution in Business Affairs. To ensure our reform efforts are successful, Dr. Jacques Gansler, Under Secretary of Defense, Acquisition and Technology, declared that another Stand-Down Day is to be held this week by all Department of Defense contracting activities. He would like us to focus on our acquisition and logistics reform initiatives, to share implementation successes, and determine how best we they can be applied to our mission.

This year's theme is "***Embracing Change for the 21ST Century Warfighter***". Your participation in today's events can help make this Symposium a success. I encourage all of you to ask questions during each topic presentation and the three work group sessions scheduled for this afternoon. We specifically want to know what is working, not working or needs improvement within the context of acquisition and logistics reform. We've come a long way, but much still needs to be done. Let's capitalize on the opportunity offered today to accelerate the revolution in business affairs, and take the next step on the road to providing better, faster and cheaper products to our customers - the warfighter.

/signed/

THOMAS J. WALLENFANG
Vice President
Contracting
